

## **A SERVICE CREATED TO MAKE ADVANCED CANCER DIAGNOSTIC ADVISORY SERVICES AND GENOMIC TESTS ACCESSIBLE EVERYWHERE**

We have designed this Service to be available to all up to the age of 74 years\*, including: Individuals, Families, Affinity Groups and Institutions. The Service may be included as a 'buy up' Rider in Health Insurance, Life Insurance or Employee Benefit Plans.

Using our Secure Online Portal and Platform to facilitate communications, TestAnalytika provides a Medical Case Manager to follow up on a Patient's Physician's Service request for Long Distance Cancer Advisory Services from top ranked US Cancer Centers, offering Genomic Testing if needed and serving as a **Value Added Integrator** for multiple tasks.

Among these are:

- Diagnostic Decision Support for Genomic Test results
- Quality Control of incoming and outgoing medical communications
- Review of Patient's Medical Records for Completeness
- Payments to the US based medical service suppliers
- Follow up on case progress
- Certified Translations
- Logistics support and tracking
- Third Party Administrator services as required
- Support in identifying relevant International Clinical Trials

**TestAnalytika seeks to make this Cancer Diagnostic Support Service accessible through bespoke Insurance Policy Coverage, inclusion in Employee Benefit Plans and Patient Self Pay options.**

"GLOBAL CARE, EVERYWHERE"

## **Support for Health Care in Developing Countries**

## **TestAnalytika Long Distance Cancer Advisory and Genomic Testing Support Service**

Complete Value Added Service Integrator facilitating Emerging Market access to Long Distance Cancer Advisory and Genomic Testing via a Secure Information Platform linking Insurance Firms, Other Payers, Translators and Logistics Services to support the International Physician.

**Cancer in Developing Countries is growing faster than in Industrialized Countries.**

"GLOBAL CARE, EVERYWHERE"

The Service seeks to make access to US Based Long Distance Cancer Advisory Services, Genomic Testing and related Diagnostic Decision Support available to Physicians and Patients in Developing Countries by acting as a **Value Added Service Integrator** including the following:

- Access to Long Distance Cancer Advisory Services by top ranked Cancer Centers in the US, offering an expert review of the case by the most renowned specialists in the world, without the Patients having to leave their place of origin. These Services are Physician to Physician, respecting the need for Patient confidentiality, professional ethics and best practices.
- Access to world renowned Genomic Testing laboratories in the USA with the latest technology in the evaluation of genomic mutations in the cancer Patient (subject to the request of the Patient's Physician). Both solid and liquid tumors are covered.
- Diagnostic Decision Support for the Genomic Test results and a review of the test results by a genomics specialist and pathologist in the US, comparing the results of the genomic test with the clinical history of the Patient.
- Quality Control of incoming and outgoing medical communications by a qualified bilingual MD ensuring that both the US medical professional and the international physician receive the information they need
- Review of Patient's Medical Records for completeness, increasing efficiency and effectiveness in the management of the Patient's case
- Payments to the US based medical service suppliers, making the Service accessible to institutions and individuals overseas
- Follow up on case progress to achieve the minimum delivery times possible
- Certified Translations as per US medical center requirements
- Logistics support and tracking of biopsies and incoming and outgoing hard copy information
- Third Party Administrator services as required to provide a seamless process flow for all parties involved
- Support in identifying relevant International Clinical Trials

**TestAnalytika seeks to make this Service accessible through bespoke Insurance Policy Coverage, inclusion in Employee Benefit Plans and Patient Self Pay options.**
